## **DISTRICT OF COLUMBIA DEPARTMENT OF HEALTH REMINDS RESIDENTS ABOUT CARING FOR YOUR PETS IN COLD WEATHER**

DOH may set up one or more emergency animal shelters at designated locations in the District.

In many areas, winter is a season of bitter cold and numbing wetness. Help your pets remain happy and healthy during the colder months by following these simple guidelines.

- Don't leave dogs outdoors when the temperature drops. Most dogs, and all cats, are safer indoors, except when taken out for exercise. Regardless of the season, shorthaired, very young, or old dogs and *all* cats should never be left outside without supervision. Shortcoated dogs may feel more comfortable wearing a sweater during walks.
- No matter what the temperature, wind-chill can threaten a pet's life. A dog or cat is happiest and healthiest when kept indoors. If your dog is an outdoor dog, however, he/she must be protected by a dry, draft-free doghouse that is large enough to allow the dog to sit and lie down comfortably, but small enough to hold in his/her body heat. The floor should be raised a few inches off the ground and covered with cedar shavings or straw. The house should be turned to face away from the wind, and the doorway should be covered with waterproof burlap or heavy plastic.
- Pets that spend a lot of time outdoors need more food in the winter because keeping warm depletes energy. Routinely check your pet's water dish to make certain the water is fresh and unfrozen. Use plastic food and water bowls rather than metal; when the temperature is low, your pet's tongue can stick and freeze to metal.
- Warm engines in parked cars attract cats and small wildlife, which may crawl up under the hood. To avoid injuring any hidden animals, bang on your car's hood to scare them away before starting your engine.
- The salt and other chemicals used to melt snow and ice can irritate the pads of your pet's feet. Wipe the feet with a damp towel before your pet licks them and irritates his/her mouth.
- Antifreeze is a deadly poison, but it has a sweet taste that may attract animals and children. Wipe up spills and store antifreeze (and all household chemicals) out of reach. Better yet, use antifreeze-coolant made with propylene glycol; if swallowed in small amounts, it will not hurt pets, wildlife, or your family.
- Always have a winter disaster plan in place for you, your family and your pets.
