

# VFC Vaccine Daily Temperature Log

Provider: \_\_\_\_\_ Pin: \_\_\_\_\_ Month and Year: \_\_\_\_\_ Unit: \_\_\_\_\_

A daily temperature log must be kept at every VFC vaccine storage location. VFC providers are required to maintain all VFC-related documentation for at least three years.

**Vaccine Storage Temperatures:**

- Refrigerated: 2° to 8° Celsius/36°to 46° Fahrenheit
- Frozen: -50° to -15° C/-58° to 5° F

Report any excursions immediately to DC VFC Program ([doh.immunization@dc.gov](mailto:doh.immunization@dc.gov)) and take immediate action:

- Isolate affected vaccines in working in-range storage unit and label “DO NOT USE”
- Contact vaccine manufacturers for viability information
- Report manufacturers’ determinations of viability to DC VFC Program
