

Vaccine Cold-Chain Monitoring

A daily temperature log must be kept at every VFC vaccine storage location and must be submitted at the end of each month to the Immunization Program. Visit www.cdc.gov/vaccines/SandH for instructions on best practices for vaccine Temperatures.

Recommended Temperatures (circle the temperature scale, °C or °F that you use):

Varicella/ProQuad/Zostervax Freezer Temperature: Between -50°C and -15°C or -58°F and +5°F (At all times)

Refrigerator Temperature: Between 2°C and 8°C or 36°F and 46°F (At all times)

*Temperature should be read and documented at the beginning and end of each day
